- where character number 3 of the 16-character option code following the part number is 1

The photovoltaic inverter products listed above comply with the requirements of the BDEW Technical Guideline - Generating Plant Connected to the Medium-Voltage Network, issued June 2008, as amended by the supplement dated January 2009

T. Alexander
VP Technology
Date: 15th June 2010

These inverter products are intended to be used with appropriate photo-voltaic arrays, electrical protection components and other equipment to form complete systems. Compliance with safety and EMC regulations depends upon installing and configuring inverters correctly. The inverters must be installed only by professional assemblers who are familiar with requirements for safety and EMC. The assembler is responsible for ensuring that the end product or system complies with all the relevant laws in the country where it is to be used. Refer to the Installation Guide.
